REFERRAL LETTER

REFERRAL TO RADIATION ONCOLOGY

DATE OF REFERRAL: 2026-03-25

TO: Dr. Helen RadOncoDemo, MD
Department of Radiation Oncology
Valley Cancer Treatment Center
4500 Medical Parkway, Suite 200
Springfield, ST 00000

FROM: Dr. Andrew TestOncologist, MD
Medical Oncology
Greenfield Medical Center
1200 Hospital Drive
Springfield, ST 00000
Phone: (555) 555-0101
Fax: (555) 555-0102

RE: PATIENT REFERRAL

Patient Name: Elizabeth TestSubject
MRN: TEST-009
Date of Birth: 1966-01-28
Sex: Female
Age: 60

REASON FOR REFERRAL

Radiation therapy consultation and treatment planning following breast-conserving surgery for left breast invasive ductal carcinoma.

CLINICAL SUMMARY

Ms. TestSubject is a 60-year-old female with recently diagnosed left breast invasive ductal carcinoma, status post left breast lumpectomy with sentinel lymph node biopsy performed on 2026-03-10 at Greenfield Medical Center by Dr. Robert SurgiTest.

SURGICAL PATHOLOGY (2026-03-10):

- Invasive ductal carcinoma, Grade 2 (Nottingham score 6/9)
- Tumor size: 1.5 cm
- Margins: Negative, closest margin 1.2 cm (deep)
- Lymphovascular invasion: Not identified
- Sentinel lymph nodes: 0/3 positive
- Pathologic stage: pT1c pN0(sn), Stage IA

BIOMARKER STATUS:

- ER: Positive (90%, strong)
- PR: Positive (70%, moderate)
- HER2: Negative (IHC 0)

- Ki-67: 12%
- Oncotype DX Recurrence Score: 14 (low risk)

TREATMENT PLAN:

The multidisciplinary tumor board (2026-03-20) recommended:

1. Whole breast radiation therapy (standard or hypofractionated course)
2. Adjuvant endocrine therapy (tamoxifen or aromatase inhibitor)
3. Oncotype DX score of 14 supports omission of adjuvant chemotherapy

The patient has been counseled regarding the role of radiation therapy in reducing local recurrence following breast-conserving surgery. She understands and agrees with the recommended treatment plan.

RELEVANT MEDICAL HISTORY

- Hypertension, controlled on lisinopril 10 mg daily
- No diabetes
- No prior chest radiation
- No connective tissue disease
- No cardiac history
- ECOG Performance Status: 0

MEDICATIONS

1. Lisinopril 10 mg daily
2. Calcium 600 mg + Vitamin D 400 IU daily
3. Multivitamin daily

ALLERGIES: NKDA (No Known Drug Allergies)

ENCLOSED DOCUMENTS

- Surgical pathology report (2026-03-10)
- Operative note (2026-03-10)
- Mammogram report (2026-01-15)
- Tumor board summary (2026-03-20)

REQUEST

Please evaluate Ms. TestSubject for adjuvant whole breast radiation therapy. Cavity clips were placed intraoperatively for radiation planning purposes. Please contact our office with the proposed radiation start date so we can coordinate initiation of endocrine therapy.

Thank you for your excellent care of our mutual patient.

Sincerely,

Dr. Andrew TestOncologist, MD
